

## Robert Mattila, Ph.D.

Contact via LinkedIn  
<https://rmattila.github.io>

September 15, 2023

### Summary

I graduated from KTH's Engineering Physics programme (BSc, MSc) in 2015 and the doctoral programme in 2020. I have spent time as a visiting researcher at the California Institute of Technology (Caltech), University of British Columbia (UBC) and Cornell University. My research on time-series modeling and decision-making under uncertainty has been published in the leading venues for ML/AI and signal processing (NeurIPS, ICML and the IEEE Transactions on Signal Processing).

Some of the skills that I picked up during my Ph.D. include:

- independent research and problem solving,
- teaching and presenting for an audience,
- written communication,
- time-management,
- critical thinking,
- algorithm implementation and evaluation,
- student (project/thesis) supervision,
- interdisciplinary collaboration.

During the last 2.5 years, I have been employed as a data scientist in the central analytics team of the leading northern European financial services group, SEB. I daily work with tools such as Python (including the standard data science and machine learning stack: pandas, scikit-learn, matplotlib, etc.), Google Cloud Platform, Apache Spark and HDFS. My work is varied but covers exploratory data analysis and developing, implementing and evaluating methods for prediction, anomaly detection and insight discovery. I have regular interactions with (non-technical) stakeholders from the business, with whom clear communication skills are of great importance.

I am interested in machine learning, mathematical modeling, data analytics and their real-world applications. To stay updated with the latest advancements in these fields, I actively engage with current research papers, algorithms and developments. I am passionate about acquiring new skills and knowledge throughout my career.

### Selected Publications:

- **Robert Mattila**, Cristian R. Rojas, Vikram Krishnamurthy, and Bo Wahlberg. Inverse filtering for hidden Markov models with applications to counter-adversarial autonomous systems. In *IEEE Transactions on Signal Processing*, 2020. [pdf]
- **Robert Mattila**, Cristian R. Rojas, Eric Moulines, Vikram Krishnamurthy, and Bo Wahlberg. Fast and consistent learning of hidden Markov models by incorporating non-consecutive correlations. In *International Conference on Machine Learning (ICML)*, 2020. [pdf]
- **Robert Mattila**, Cristian R. Rojas, Vikram Krishnamurthy, and Bo Wahlberg. Inverse filtering for hidden Markov models. In *Advances in Neural Information Processing Systems (NeurIPS)*, 2017. [pdf]
- **Robert Mattila**, Antti Siika, Joy Roy, and Bo Wahlberg. A Markov decision process model to guide treatment of abdominal aortic aneurysms. In *IEEE Conference on Control Applications*, 2016. [pdf]

## Professional Experience

- **SEB Analytics** Stockholm, Sweden  
*Data Scientist* *March 2021 – Present*
  - Extending capabilities in areas such as prediction, anomaly detection and insight discovery using modern tools for advanced analytics (e.g., Apache Spark, pandas, scikit-learn). My professional journey has spanned roles in sensitive domains like financial crime prevention and KYC analytics, where I contributed to the growth of analytics teams, from small groups to larger, thriving teams. Presently, I work on AI projects, with a specific focus on NLP and LLMs, applying these technologies across diverse domains.
- **KTH Royal Institute of Technology** Stockholm, Sweden  
*Post-Doctoral Researcher* *2020 – 2021*
  - Helped with supervision of younger Ph.D. students. Published two conference articles and two journal articles.

## Education

- **KTH Royal Institute of Technology** Stockholm, Sweden  
*Ph.D., Division of Decision and Control Systems* *2015 – 2020*
  - Supervisors: Prof. Bo Wahlberg and Prof. Cristian R. Rojas.
  - Title: *Hidden Markov Models: Identification, Inverse Filtering and Applications*. [pdf]
  - Committee: Prof. John Lygeros (opponent), Prof. Jan H. van Schuppen, Prof. Tobias Rydén, and Assist. Prof. Ayça Özçelikkale
- **KTH Royal Institute of Technology** Stockholm, Sweden  
*Licentiate, Department of Automatic Control* *March, 2018*
  - Supervisors: Prof. Bo Wahlberg and Prof. Cristian R. Rojas.
  - Title: *Hidden Markov models: Identification, control and inverse filtering*. [pdf]
  - Opponent: Prof. Eric Moulines, Ecole Polytechnique (Paris, France).
- **KTH Royal Institute of Technology** Stockholm, Sweden  
*B.Sc. Engineering Physics, M.Sc. Systems, Control and Robotics* *2010 – 2015*
  - The Swedish degree of *Civilingenjör i Teknisk Fysik*.
  - Graduated in 4.5 years, instead of nominal 5 years.
  - B.Sc. GPA of 5.0/5.0 and M.Sc. GPA of 5.0/5.0 .
- **UCM, Universidad Complutense de Madrid** Madrid, Spain  
*ERASMUS Exchange studies* *Spring 2013*
  - All (five) courses taken were taught in Spanish (including reading material).
  - GPA of 8.13/10.0 .
- **THG, Thorildsplans gymnasium** Stockholm, Sweden  
*Natural Sciences with specialization in Mathematics and Computer Science* *2007 – 2010*
  - GPA of 20.0/20.0 .

## Courses

### University (Ph.D.):

- **Mathematics:**
  - Mathematical Methods in Signals, Systems and Control (e.g., Functional Analysis)
  - Game Theory
  - Matrix Algebra
- **Statistics:**
  - Bayesian Networks
  - Probabilistic Verification and Synthesis
  - Probability and Random Processes
  - Optimal Filtering<sup>1</sup>
- **Machine Learning:**
  - Partially Observed Markov Decision Processes
  - Convex Optimization
  - Stochastic Control and Optimization
  - Deep Learning in Data Science<sup>1</sup>
  - Distributed Optimization<sup>1</sup>
  - Mathematical Foundations of Machine Learning<sup>1</sup>
- **Other:**
  - Scientific Writing
  - Basic Communication and Teaching
  - Theory and Methodology of Science
  - Hybrid Systems (Stability, Stabilization, Abstraction and Formal Verification)

### University (M.Sc., B.Sc.):

Grade A in all courses except one B (GPA 5.0/5.0):<sup>2</sup>

- **Programming:**
  - Fundamentals of Programming and Computer Science (Python, Algorithms and Data-Structures)
  - Object-Oriented Program Construction (Java)
  - Numerical Methods
- **Physics:**
  - Thermodynamics
  - Classical Physics
  - Mechanics I
  - Mechanics II
  - Strength of Materials and Solid Mechanics
  - Modern Physics
  - Electromagnetic Theory
  - Quantum Physics
  - Statistical Physics
  - Fluid Mechanics
  - Atmospheric Physics
  - Geophysics
  - Solid-State Physics
- **Mathematics:**
  - Linear Algebra
  - Single-Variable Calculus
  - Multi-Variable Calculus
  - Complex Analysis
  - Differential Equations and Transforms
  - Mathematical Methods in Physics (Vector Analysis, Partial Differential Equations)
  - Probability Theory and Statistics
- **Systems:**
  - Automatic Control
  - Modelling of Dynamical Systems
  - Mathematical Systems Theory
  - Nonlinear Control
  - Hybrid and Embedded Control Systems
  - Geometric Control Theory
  - Advanced Control Theory and Practice
  - Optimal Control Theory
- **Other:**
  - Spanish B1
  - Spanish B2
  - Theory and Methodology of Science

<sup>1</sup>Attended lectures.

<sup>2</sup>Grading scale: Excellent (A), Very Good (B), Good (C), Satisfactory (D), Sufficient (E).

## Other:

---

- Stockholm University, M.Sc.-level:
  - Decision Support Methods (IB652C), 7.5 hec
  - Decision Theory (ML431C), 7.5 hec
  - Risk Management (ML432C), 7.5 hec
  - Programming for Data Science (ML437N), 7.5 hec
- Coursera:
  - SQL for Data Science (UC Davis)
  - How Google does Machine Learning (Google)
  - Quantum Computing: Less Formulas, More Understanding (St Petersburg University)
  - Successful Negotiation: Essential Strategies and Skills (University of Michigan)
  - TensorFlow Developer (DeepLearning.AI)
  - Financial Markets (Yale University)
  - DeepLearning.AI TensorFlow Developer Specialization (DeepLearning.AI)
  - Sequences, Time Series and Prediction (DeepLearning.AI)
  - Natural Language Processing in TensorFlow (DeepLearning.AI)
  - Convolutional Neural Networks in TensorFlow (DeepLearning.AI)
  - Introduction to Machine Learning in Production (DeepLearning.AI)
  - Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning (DeepLearning.AI)
  - Natural Language Processing with Classification and Vector Spaces (DeepLearning.AI)
  - Structuring Machine Learning Projects (DeepLearning.AI)
  - Applied Social Network Analysis in Python (University of Michigan)
- NVIDIA Deep Learning Institute:
  - Fundamentals of Deep Learning for Computer Vision
  - Medical Image Segmentation with DIGITS
  - Image Segmentation with TensorFlow
  - Deep Learning Workflows with TensorFlow, MXNet and NVIDIA-Docker
- fast.ai: Practical Deep Learning for Coders, v3

## Skills, Merits and Awards

### • Computer Skills:

**Programming:** Python, Matlab  
**Operating Systems:** Linux, Mac, Windows  
**Other:** L<sup>A</sup>T<sub>E</sub>X, git

- **Languages:** Swedish (native), English (fluent) and Spanish (intermediate).

### • Awards:

- Awarded Jubilee Appropriation from the Knut and Alice Wallenberg foundation in 2018.
- Awarded the KTH Electrical Engineering Scholarship of Excellence (1 MSEK) in 2015. The scholarship is intended to reward the recruitment of candidates of the highest standard, whose achievements and performance, in depth and breadth, are overall of an excellent quality.
- Awarded travel scholarship from the Borgquist Foundation in 2015.
- Awarded a SURF scholarship from Caltech to work with Prof. Richard Murray in 2014.

- Awarded the Henrik Göransson’s Sandviken Scholarship and the KTH Student Scholarship (twice) for outstanding grades during B.Sc. and M.Sc. studies.
- Participated in the final of *Wallenbergs Fysikpris 2010* (Swedish qualifications for the International Physics Olympiad).
- Awarded scholarship for outstanding grades when graduating from THG.
- I have written **reviews** for:
  - IFAC American Control Conference,
  - IFAC European Control Conference,
  - IFAC Automatica,
  - IEEE Conference on Decision and Control,
  - ACL Conference on Learning Theory (COLT),
  - IEEE Transactions on Automatic Control,
  - IEEE Signal Processing Letters,
  - IEEE Transactions on Aerospace & Electronic Systems,
  - IEEE Transactions on Information Theory,
  - Neural Information Processing Systems (NeurIPS).
- **KIBok** ([www.kibok.se](http://www.kibok.se)): A website for buying and selling second-hand textbooks, targeting students at the Karolinska Institute. I developed the website using Python and Django, and it was running between 2013 and 2019.
- Hold a Swedish driver’s license (B).

## Teaching

- **Gen AI Bootcamp (with Zenodia Charpy)** SEB/NVIDIA/Combient  
*Teaching assistant* *Autumn 2023*  
 This hands-on, in-person bootcamp presents the fundamentals of generative AI with a sole focus on orchestrating Large Language Models (LLMs) in a conversational flow; introduce NVIDIA NeMo Guardrails frameworks for developing applications powered by LLMs; explore levels of control using NeMo Guardrails to set different boundaries; and cover how to utilize LLMs in everyday work.
- **EL1000 Automatic Control (with Prof. Bo Wahlberg)** KTH  
*Teaching assistant* *Autumn 2020*  
 See below.
- **EL2805 Reinforcement Learning (with Prof. Alexandre Proutiere)** KTH  
*Teaching assistant, 120 students* *Autumn 2018*  
 The course provides an in-depth treatment of the modern theoretical tools used to devise and analyse RL algorithms. It includes an introduction to RL and to its classical algorithms such as Q-learning, and SARSA, but further presents the rationale behind the design of more recent algorithms, such as those striking optimal trade-off between exploration and exploitation. The course also covers algorithms used in recent RL success stories, e.g., deep RL algorithms.  
  
 Selected feedback from the course evaluation:  
*“Robert is a great tutor”, “Robert Mattila goes the extra mile when teaching”*
- **EL2800 Stochastic Control and Optimization (with Prof. Alexandre Proutiere)** KTH  
*Teaching assistant* *Autumn 2017*  
 This course introduces basic theories and methodologies for the analysis and the design of stochastic control policies, including: Markov chains, Markov Decision Process (MDP), Dynamic Programming and value/policy iteration methods, design of approximate controllers for MDPs, stochastic linear quadratic control and multi-armed bandit problems.

- **EL1000 Automatic Control (with Prof. Bo Wahlberg)** KTH  
*Teaching assistant* Autumn 2016  
 An introductory course on control systems. It provides the students with the basic engineering knowledge of dynamic systems and feedback.  
 Selected feedback from the course evaluation:  
 “Extra stort tack till Robert och Emma, två grymma assar”, “Övningsledarna Emma och Robert var väldigt pedagogiska och lärde en mycket”
- **EL1000 Automatic Control (with Prof. Bo Wahlberg)** KTH  
*Teaching assistant* Autumn 2015  
 See above.

## Student Supervision

- **Master Thesis** SEB/KTH  
*Industrial Supervisor of Giorgio Sacchi* Spring 2023  
 – Title: *Explainable AI for Finance: Adaptive Sampling for Counterfactual Explanations*
- **DD2430 Project Course in Data Science** SEB/KTH  
*Industrial Supervisor of V. Nedungadi, C. Saccardi, S. Bonato and D. Richards* Autumn 2022  
 – Title: *Evaluating Graphons as Efficient Graph Embeddings*
- **Master Thesis** SEB/LIU  
*Industrial Supervisor of Erik Lundin* Spring 2022  
 – Title: *Generating Directed & Weighted Synthetic Graphs using Low-Rank Approximations*
- **Master Thesis** SEB/KTH  
*Industrial Supervisor of Johan Hammarstedt* Spring 2022  
 – Title: *Synthetic Graph Generation at Scale: A novel framework for generating large graphs using clustering, generative models and node embeddings*
- **Master Thesis** Scania/KTH  
*Academic supervisor of Karl Hemlin* Autumn 2020  
 – Title: *Improved Fuel Supply for Water-to-Air Heaters in Scania Trucks*
- **Bachelor Thesis** KTH  
*Supervisor of Ossian Krödel and Rasmus Jerndal* Spring 2018  
 – Title: *Portfolio Optimization with Market State Analysis*
- **Bachelor Thesis** KTH  
*Supervisor of Gustav Ekman and Fredrik Rubin* Spring 2018  
 – Title: *Portfolio Inversion: Finding Market State Probabilities from Optimal Portfolios*
- **Master Thesis** KTH  
*Supervisor of Daniel Merkoulouva* Spring 2017  
 – Title: *Optimal Input Design by Model Predictive Control for System Identification*
- **EH1010 Project Course in Electrical Engineering** KTH  
*Supervisor of six students* Spring 2016  
 – Modeling and designing various control architectures for a Segway. Implementation in Java.

## Miscellaneous Experience

- **Cornell University** Ithaca, USA  
*Invited researcher by Prof. Vikram Krishnamurthy* Summer 2019

- Worked on inverse filtering problems for counter-adversarial autonomous systems.
- **International Conference on Machine Learning (ICML'18)** Stockholm, Sweden  
*Attended the conference, tutorials and workshops* Summer 2018
- **IFAC Symposium on System Identification (SYSID'18)** Stockholm, Sweden  
*Volunteer in the organizing crew (responsible for scheduling, technical support, etc.)* Summer 2018
- **Cornell Tech** Manhattan, USA  
*Invited researcher by Prof. Vikram Krishnamurthy* Summer 2017
  - Worked on inverse problems for Bayesian optimal filters.
- **VUB-ELEC, Workshop on System Identification** Brussels, Belgium  
*Included courses on* Summer 2017
  - Frequency response function measurements (non-parametric tools), dynamic system identification (parametric tools) and control-oriented system identification by, among others, John Lataire, Yves Rolain, Rik Pintelon, Ivan Markovsky, Philippe Dreesen and Simone Formentin.
- **S<sup>3</sup>CS, Swedish Summer School in Computer Science** Djurö, Sweden  
*The courses were taught by* Summer 2016
  - Michael Mitzenmacher (Hashing Algorithms);
  - Sergei Vassilvitskii (Algorithms for Modern Parallel Systems).
- **UBC, University of British Columbia** Vancouver, Canada  
*Invited researcher by Prof. Vikram Krishnamurthy* Summer 2015
  - Worked on method of moments estimators for hidden Markov models.
- **UBC, University of British Columbia** Vancouver, Canada  
*Master thesis with Prof. Vikram Krishnamurthy* Autumn 2014
- **Caltech, California Institute of Technology** Pasadena, USA  
*SURF in the Control and Dynamical Systems (CDS) group* Summer 2014
  - Supervisors: Prof. Richard M. Murray and Asst. Prof. Yilin Mo
  - Developed an improved abstraction algorithm for the correct-by-construction controller synthesis framework TuLiP (implemented in Python).
- **KTH, Royal Institute of Technology** Stockholm, Sweden  
*Research intern for Prof. Bo Wahlberg* Summer 2013
- **ZJU, Zhejiang University** Hangzhou, China  
*Participated in the Joint Research Center of Photonics Workshop* Summer, 2012
  - Implemented optical logic gates exploiting non-linearities in fibers.
- **Stockholm Vatten AB** Stockholm, Sweden  
*Summer intern* Summer 2012
  - Same as below.
- **Stockholm Vatten AB** Stockholm, Sweden  
*Summer intern* Summer 2011
  - Warehouse work including: collecting and delivering items; cleaning and repairing machines; contacting customers; administrative work in the supply system Agresso.
